Re Chicago teletype to Bureau, Et Al, dated 4/12/68.

Attached herewith is one Prinz "Air Release" camera remote shutter cable which was obtained from the Superior Bulk Film Company, Chicago, Illinois. This is the same remote shutter release which was sent to GALT by the above firm when GALT was residing in Birmingham, Alabama.

The Laboratory is requested to determine if the attached remote shutter release and the one found in GALT's car when it was abandoned in Atlanta, Georgia, are of the same manufacturer. It is requested that the attached item be returned to the Chicago Division upon completion of the comparison.

Q210 Black leather strap, 5/8" wide
Q211 Dried plant material
Q212 Towel with white, blue, green and yellow stripes
Q213 Red, white and blue plastic pin and portion of pin

Results of examination:

Brown cotton fibers, green cotton fibers and green rayon fibers that could have come from the Q13 bedspread were found on Q207 and Q208. None were found on Q204, Q205, Q206 or Q212.

Several Caucasian head hairs were found on the Q206 sofa pillow and on the Q208 sheet and numerous such hairs were found on the Q207 sheet. Some of these hairs are like the previously described hairs from the Q38 hairbrush and other items and could have come from the same person. It is pointed out that hairs do not possess enough individual microscopic characteristics to be positively identified as originating from a particular person. Most of the hairs from Q206, Q207 and Q208 are different from the previously described hairs from Q38 and other items and did not originate from the same person.

The Q209 strap, which appears new, measures $37\frac{1}{2}$ " in length. This strap fits the strap guides on the Q14 binoculars and could be the strap for Q14. No strap is presently on Q14.

A short hand strap is presently on the Q22 binoculars case. The Q210 strap has the same appearance as the hand strap on Q22 except that it is longer. Specimen Q210 could be the shoulder strap for the Q22 case. The Q210 strap appears new and measures 37" in length.

No plant material similar to specimen Q211 was found in the previously submitted debris from the Mustang.

No marks to indicate source were found on Q213. The Q213 pin appears to be a patriotic emblem.

are hairs or fibers that may be suitable for comparison with other material submitted by the Memphis Division.

In addition, of possible interest are the two black leather straps submitted herewith. Possibility exists that they may have connection with binoculars submitted and/or rifle in instant case. The Laboratory should examine binoculars, binocular case, and/or rifles to see whether or not possibility exists markings may help associate these items.

In addition, the necessary examination for latent prints should be made on both leather belts.

Memphis does not know at this time whether in examination of automobile conducted by Atlanta any grassy materials recovered. In the event such was submitted, the grass submitted by Memphis should be compared if such is possible.

Markings on material submitted disclosed the initials "ELH" which represent those of E. LARRY HUTCHINSON, Investigator, Attorney General's Office, Shelby County, Memphis, Tennessee. The other initials "OVJ" are those of the Agent receiving the material from E. LARRY HUTCHINSON. In one instance, the striped towel was received by SA CYRIL F. BUSCH from Inspector N. E. ZACHARY, Memphis PD.

The plastic red, white, and blue decorative pin was located by Lt. GLENN KING, Memphis PD, and turned over to Special Agents.

All the above evidence should be returned to the Memphis Division upon completion of the requested examinations.

Results of examination:

The previously submitted bedspread, specimen Q13, is composed of brown cotton fibers, green cotton fibers and green rayon fibers. Brown cotton fibers, green cotton fibers and green rayon fibers that could have come from the Q13 bedspread were found on Q95, Q97 through Q104 and Q106 and in the Q117 sweepings. No such fibers were found on Q89 through Q92 or in the Q114 through Q116 sweepings.

Caucasian head hairs like the hairs previously found on the Q13 bedspread, in the Q15 zipper bag, on the Q26 towel, on the Q29 and Q30 socks and on the Q38 hairbrush were found on Q95, Q97, Q99, Q100 and Q103. These hairs could have come from the same person. It is pointed out that hairs do not possess enough individual microscopic characteristics to be positively identified as originating from a particular person. Caucasian head hairs were also found in the Q114 through Q117 vacuum sweepings. Some of these hairs are like the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and could have come from the same person. Some of the hairs from Q114 through Q117 are different from the Q13, Q15, Q26, Q29, Q30 and Q38 hairs and did not come from the same person. No hairs were found on Q89 through Q92, Q98, Q101, Q102, Q104 or Q106.

The Q89 through Q91 floor mats are composed of translucent red plastic. No brand names are indicated on the mats. The letters "HIS" are hand printed on the back of each mat, apparently with a felt tip marker. The significance of the letters is not known.

Specimen Q92 is a black and gray plaid rubber mat. No marks were found on Q92.

Specimens Q94, Q108 and Q109 are standard items furnished with Mustangs.

Specimen Q95 is a dark blue short-sleeved sweat shirt of medium size. No labels or laundry marks were found on Q95.

Specimen Q96 is a black and white rubber sandal for the left foot. A label on the bottom bears the following: "MEN'S - M SHOE SIZE 7-8½ JAPAN"

Specimen Q97 is a twin-bed size, fitted, white bed sheet. Specimen Q99 is a white pillowcase. A white laundry tape is present on Q97 and Q99. The following is printed in black on each tape: "2-OR-3" It was concluded that the marks on these tapes did not originate from the machine which prepared the laundry tapes on the Q69 shorts and the Q70 T shirt.

Specimen Q98 is a black and white shirt jacket. The following is present on the label of Q98:

" M RN19788 65% DACRON 35% COTTON
15-15½ MONTICELLO SHIRT JACKET TAPERED"

Specimen Q100 is a twin-bed size, fitted, white bed sheet. The sheet is in two pieces. The two pieces are stitched together with yellow thread and white thread. Inquiry at a department store in Washington, D. C., developed the following information concerning Q100: It is a #3 grade irregular seamed sheet. Most such sheets even if manufactured in the United States are sold in other countries. If sold in this country, they are sold in low class "illegitimate stores." Such sheets do not bear the manufacturer's name.

Specimen Q101 is a black short-sleeved shirt. The following is present on the label of Q101:

"ARTURO ROSETTI CUSTOM TAILORED -L- 100% COTTON
MADE IN U.S.A. RN15722"

Specimen Q102 is a pair of olive green walking shorts. The following is present on the label of Q102:

"HONG KONG DIPLOMAT CUSTOM TAILORED 65% POLYESTER FIBRE
35% SUPER FINE COTTON WAIST 34"

Specimen Q103 is a light pink, looped pile cotton rug that measures 24" by 56½". No labels were found on Q103.

Specimen Q104 is a feather pillow that measures about 19" by 24". The pillow has a specification label. The back of the label is stamped "9 1967."

Specimen Q105 is a container for a Polaroid camera, possibly a model 230. No label was found on Q105.

Specimen Q106 is a pair of men's stretch socks with no label.

Other than the laundry tapes on Q97 and Q99, no visible laundry marks were found on any of the cloth items listed above. No invisible laundry marks were found on any of these items.

No buttons are missing from any of the garments listed above.

The Q107 hunting knife has a blade that measures 3 9/16" in length. The blade is rusty. The words "GESCO JAPAN" are imprinted on one side of the blade and the number "45" is imprinted on the other side. The word "GESCO" is stamped on the sheath.

Specimen Q110 is a flat-tipped Stanley brand screwdriver.

Specimen Q111 is an "ANCO" brand windshield wiper blade. Part of the rubber has been torn off.

Specimen Q112 is a "Personna" double-edge razor blade. No hairs were found on Q112.

The K30 and K44 through K59 soils from Memphis are different from the soil found on the previously submitted Q13 bedspread in physical characteristics and composition. Therefore, the soil from the bedspread did not come from the sources of K30 and K44 through K59.

No soil similar to the soil from the bedspread was found in Q113, Q143 through Q158, Q160 and Q161 or on the Q163 tire and wheel. None of these soils from the car originated from the source of the soil on the bedspread.

Although nothing was noted which would aid in the determination of the original sources of specimens Q113, Q143 through Q146, Q148, Q149, Q151, Q152, Q154 and the soil from Q163, they are suitable for comparison purposes. Specimens Q147, Q150, Q153, Q155

through Q158, Q160 and Q161 are either too limited in amount or too mixed with miscellaneous debris to be of value for significant comparisons other than for elimination purposes.

The soils from the car were different from K30 and K44 through K59 in physical characteristics and composition and, therefore, did not come from the sources of K30 and K44 through K59.

No soil of value for significant comparison was found on Q89 through Q106 or in the vacuum sweepings, specimens Q114 through Q117. The mineral debris in Q114 through Q117 consists of typical car floor debris, a mixture of miscellaneous materials from numerous sources. No mineral debris of apparent significance was found in Q114 through Q117.

The scrapings from under the glove compartment, Q159, do not contain blood.

The Q162 liquid was identified as water. No traces of any alcohols such as used in windshield wash were identified in this specimen.

Enclosed for the FBI Laboratory, under separate cover, are ten soil samples of soil obtained from the area in the rear of 418 and 422 1/2 South Main Street, Memphis, Tennessee. For information of the Laboratory, it is believed that the killer of DR. MARTIN LUTHER KING fired from a bathroom window on the second floor of 418 South Main Street.

It is requested that these samples be compared with any and all other soil samples submitted in this investigation. The results of the Laboratory findings should be submitted to Memphis and any other interested Office. Upon completion of your investigation, these samples should be returned to Memphis where they will be retained as evidence.

(OO: FBI)

Enclosed for the FBI Laboratory, under separate cover, are seven soil samples of soil obtained from the area in the rear of 418 and 422 1/2 South Main Street, Memphis, Tennessee. For information of the Laboratory, it is believed that the killer of DR. MARTIN LUTHER KING killed from a bathroom window on the second floor of 418 South Main Street. It is requested that these samples be compared with any and all other soil samples submitted in this investigation. The results of the Laboratory findings should be submitted to Memphis and any other interested Office. Upon completion of your investigation, these samples should be returned to Memphis where they will be retained as evidence.
