For the information of the Laboratory, Mr. BROTON advised that the Thermo Seal tape, Lot #517, was made in November or December, 1967, but their quality control does not show the number of warp yarns in the cloth. He further noted that the face of the tape has a whitish cast because it is coated with a starch-type material. He stated the true color appearing on the garments recovered in instant case would more closely resemble the color of the underside of the tape.

It is noted that Lot #517 was found to be the lot number of the tape in the possession of Home Service Laundry and Dry Cleaning, 5280 Hollywood Boulevard, Hollywood, California, as furnished to Albany Office by Los Angeles Office by re teletype.

The Laboratory is requested to compare the enclosed specimen of tape with the tape on the garments recovered immediately after the slaying at Memphis for identification of the tape.

The sets of type are furnished to the Laboratory for assistance in examinations being conducted on the laundry marks.

This evidence is being forwarded by Eastern Airlines, Flight 371, from Syracuse to Washington, D. C., on 4/12/68. Arrangements for pick-up in Washington are being made directly with WFO.

It was concluded that ANITA LOUISE KATZWINKEL, K26, did not prepare the questioned handwriting "Ginger & Anita Katzwinkel" appearing on Q118, the portion of a tissue box, previously submitted. Because of unexplained variations and insufficient comparable material, a definite conclusion could not be reached whether KATZWINKEL prepared any of the remaining questioned handwriting on Q118. Some significant handwriting differences were noted in this remaining questioned handwriting excluding the words "Day" and "at pool." These words are too limited and contain insufficient handwriting characteristics to determine if they were or were not prepared by KATZWINKEL.

See C-

Due to the lack of a sufficient number of significant comparable letters, it was not possible to determine if the words "brouh" and "Olkahombe" on Q118 were prepared by the person or persons responsible for the remaining questioned handwriting appearing on this specimen.

It was concluded that the FLIKEID signatures appearing on the bottom of K27, were prepared by THOMAS M. FLIKEID, FBI#534039D.

Because of insufficient significant comparable handwriting and unexplained variations, a definite conclusion could not be reached whether the questioned Lowmyer signature on the gun invoice previously submitted or the writings attributable to Eric S. Galt, previously submitted, were prepared by the writer of K27. Some handwriting differences were noted in the handwriting attributable to Galt when compared with K27, however, these characteristics are not sufficiently strong to definitely eliminate FLIKEID as a possible writer of the Galt material.

The K28 and K29 maps are not identical with two maps, Q18 and Q20, previously submitted and recovered from the blue bag in Memphis.

Q139, Q140, K27 through K29 are temporarily retained. Appropriate photographs of the writing appearing on K27 have been made.

One 8 inch head hair of Caucasian origin was found inside the Q139 left shoe. This has been dyed black. No similar hairs were found in or on items previously submitted in this case. No other hairs or debris was found in Q139 or Q140.

Because of unexplained variations and insufficient comparable material, a definite conclusion could not be reached whether KATZWINKEL prepared any of the remaining questioned handwriting on Q118. Some significant handwriting differences were noted in this remaining questioned handwriting excluding the words "Day" and "at pool." Specimens received 4/10/68, from FBI, Las Vegas

K8 Three tape strips of marking tape utilized by the Monarch Laundry, 1430 South Main, Las Vegas, Nevada, two of which bear the code O2B-6, and one bearing the code MOX72.

Specimen received 4/11/68, from FBI, Philadelphia

K9 Piece of white cloth containing six samples of thermo-seal marking tape obtained from Thermo-Seal Identification Machine, Model H5L1, Serial Number 32052, operated by Barclay Laundry, 1478 Broadway, Camden, N.J.

Specimen received 4/11/68, from FBI, Los Angeles

K10 Piece of paper and a cloth square each containing twelve samples of laundry marking printed by a thermo-seal marking machine manufactured by the Textile Marking Company, Syracuse, New York, and obtained from Home Service Laundry and Dry Cleaning, 5280 Hollywood Boulevard, Los Angeles, California

Result of examination:

The three pink tape strips in K8 and K9 are similar to the Q69 and Q70 laundry tapes in color, construction and composition.

The twelve laundry tapes (K10) are similar to the Q69 and Q70 laundry tapes in color, construction and composition.

Five of these tapes have the same length (1 1/16 inches) as Q69 and Q70. The other nine are longer, either 1 3/32 inches or 1 1/8 inches in length.

The K8 and K9 tapes were found to differ in printing from the tapes appearing on Q69 and Q70.

The tapes comprising K10 are of varying lengths; however, no significant differences were noted between the Q69 and Q70 laundry tapes when compared with some of the K10 tapes indicating they may have originated from the same machine.

Specimens K8, K9 and K10 are retained.
