RE: MURKIN

REFERENCE: Bureau telephone calls of 4/19/68
EXAMINATION REQUESTED BY: Atlanta
SPECIMENS:

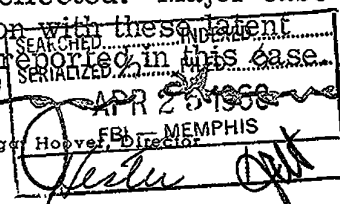

This report confirms and supplements Butel
dated 4/19/68.

See the attached page for the results of the comparisons of two of the latent fingerprints previously reported in this case, and the page attached to the report dated 4/24/68, to Memphis, for results of comparisons of six of the latent fingerprints. The remaining latent fingerprints, with the exception of the latent fingerprint previously reported on the lift from the flophouse marked "Rt. side of fireplace (front)," are not identical with the fingerprints of James Earl Ray, FBI #405942G. The latent print lifted from the flophouse and the two latent impressions previously reported were compared, insofar as possible, with the fingerprints of Ray, but no identification was effected. Major case prints of Ray needed for conclusive comparison with these latent prints, as well as with the latent palm prints reported in this case.

Re: MURKIN

Date: April 24, 1968
FBI File No. 44-38861
Lab. No. PC-A5780 BX
D-561212 JK

Specimens received 4/19/68

K169 Empty Schlitz beer can, 12-ounce size, from Southaven
Minnow Shop
K170 Brown paper bag from Southaven Minnow Shop

Results of examination:

Marks appearing in the number impressions on the bottoms of K169 and the previously submitted Q53 can of beer were identified as having been made by the same number dies. The marks on the Q52 can of beer were not identified with K169 or Q53, possibly because the marks were not so deeply or completely impressed in Q52.

The K170 paper bag was found to be similar in all observable characteristics to the Q55 paper bag which was previously submitted.

Remarks:

It should be noted that the questioned writings on some of the items received in this case are limited to the "Galt" name alone. The identification of the "Galt" writings, with K171, as set forth in the attached report, considered all these questioned writings as a unit and it may not be possible to identify a particular specimen with K171 because of the limited nature of the questioned writing involved and the lack of comparable known material. The "Galt" writings are those items attributed to ERIC S. GALT which were previously identified together.

For information, similarities were noted between K171 and the "Lowmyer" signature on Q72.

To: **FBI, Memphis (44-1987)**
Re: **MURKIN
CR**

Date: **April 23, 1968**
FBI File No. **44-38861**
Lab. No. **D-561274 JK**

Specimens received **4/22/68**

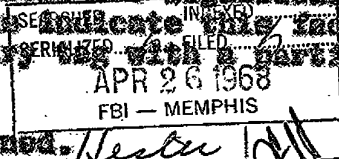

- K172 Sample #1, laundry tape, obtained from Thermo-Seal machine, Serial No. 32182, Model H5L4**
- K173 Sample #2, laundry tape, obtained from Thermo-Seal machine, Serial No. 31990, Model H5L4**
- K174 Sample #3, laundry tape, obtained from Thermo-Seal machine, Serial No. 32190, Model H5L4**
- K175 Sample #4, laundry tape, obtained from Thermo-Seal machine, Serial No. 32189, Model H5L4**
- K176 Envelope No. 5, Wearing Apparel Rate tag, Flat Rate tag and Customer Receipt, of laundry list No. 31053**
- K177 Envelope No. 6, Wearing Apparel Rate tag and customer receipt of laundry list No. 30823**

Result of examination:

The size and style of the numerals and letters on K172 through K175, was well as those appearing on some other known specimens received, are the same as corresponding portions of the laundry tapes appearing on the Q97 sheet and the Q99 pillow case.

Because of the lack of identifying features on which to base a definite opinion, it could not be established that one of the machines used to prepare K172 through K175 was used to prepare the questioned laundry marks. Of these known specimens, only K175 has the letters "G" and "A" spaced the same as on the Q97 and Q99 tags. There are an insufficient number of known specimens available imprinted "268-3" to assess the significance of this feature; however, prior examination indicate this factor alone is not sufficient to identify a laundry tag with a particular machine.

K172 through K177 have been retained.
